1.3 Hardware Installation

Please follow the steps shown below for installation of your DVD Maker 2 and follow the pictorial guide below for peripheral connections.

1. Connect the AV/S-VIDEO input into the DVD Maker 2 connector.
2. Plug DVD Maker 2 Dongle into the USB 2.0 port of your system.

Chapter 2 : DVD Maker 2 Quick Installation

The DVD Maker 2 package comes with complete Windows software utilities. These utilities can be found on the CD-ROM in this package. During installation, it is highly recommended to disable any sub-programs. These include applications such as antivirus software and system monitoring applications.

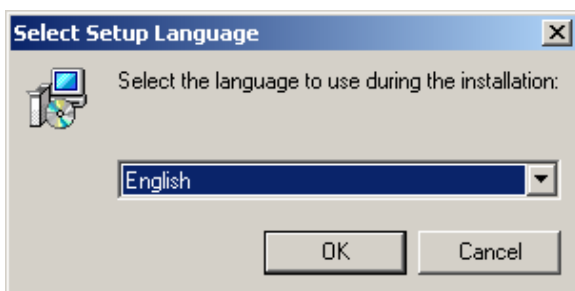

1. When you finish the hardware setup, the “**Found New Hardware Wizard**” window will pop up. Please click “**Cancel**” and you can make use of DVD Maker 2 Quick Installation for proper installation.

2. Insert the installation CD into the CD ROM device. The autorun page will appear as the left image. Please choose “**Driver Installation**”.

Note: Your DVD Maker 2 device must plug in the USB2.0 port before installation.

3. Please select setup language then choose “**OK**”.

4. Click “**Next**” to install the DVD Maker 2 driver.

5. Click “**Install**” to continue with the installation, or click “**Back**” if you want to review or change any settings.
Please wait, while the installation is in process

6. Please choice “**Finish**” and Now the driver has been installed on your computer.

Chapter 3 : FAQ

1. How to check if the driver has been installed successfully or not?

Ans : Right click on “My Computer” on the desktop and choose “Properties”. Once in “Properties” window, click on “Device Manager” in Hardware panel. Click on the plus icon of “Sound, video and game controllers” to open the device list. See **Fig.1** below.

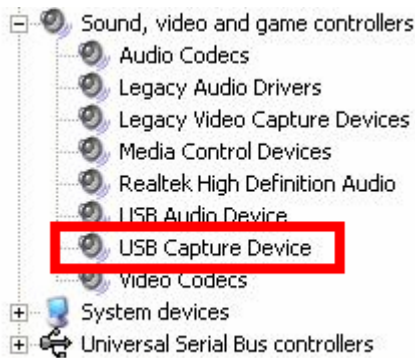

Fig.1

2. How to uninstall device driver?

Ans : Click on “Start” on the left-down desktop and choose “Setting”. Once in “Control Panel” window, click on “Add or Remove Programs”. Click on the plus icon of “Change or Remove Programs” then choose “KWorld Editing Device Driver” to remove the device

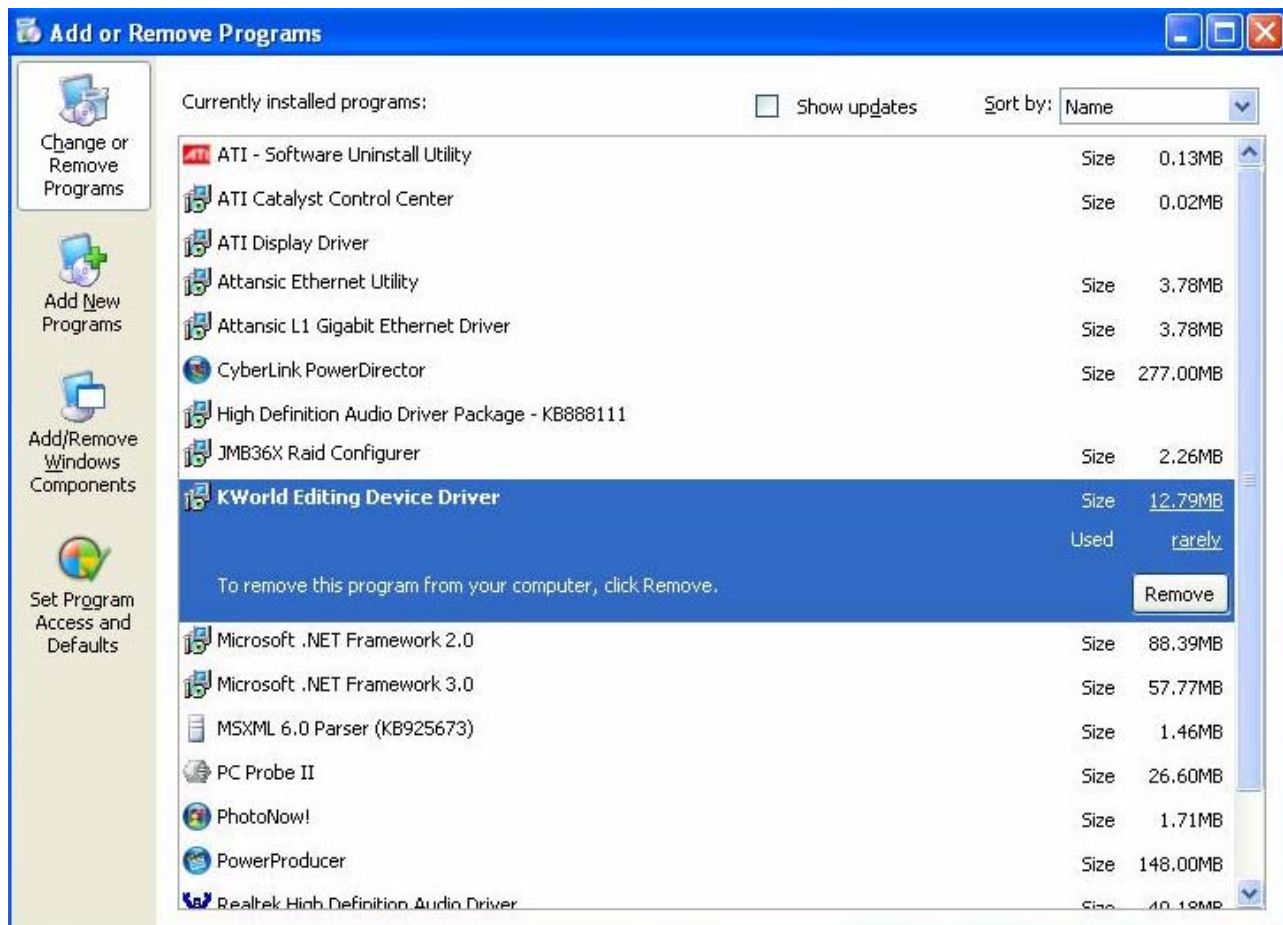

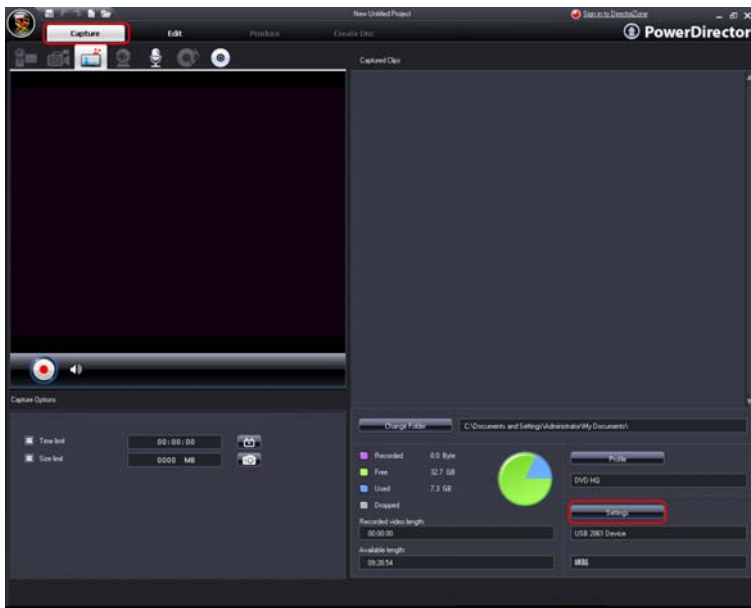

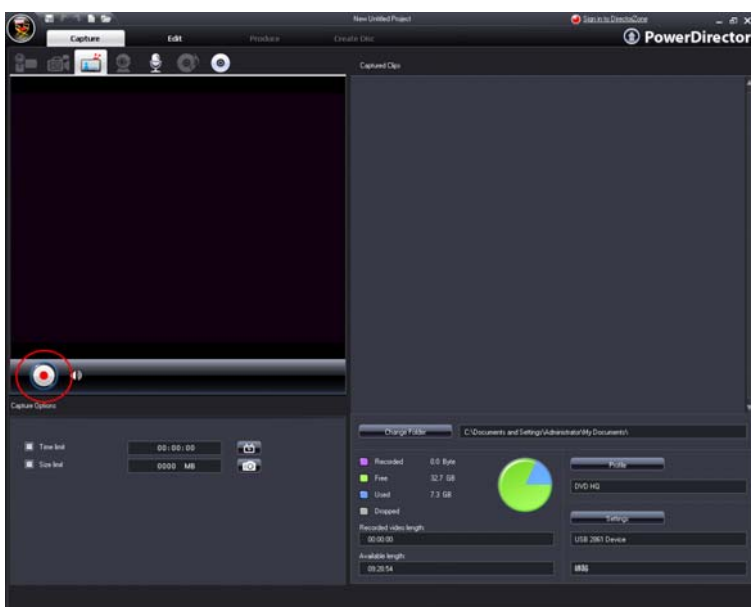

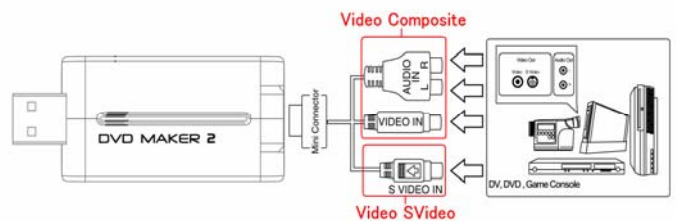

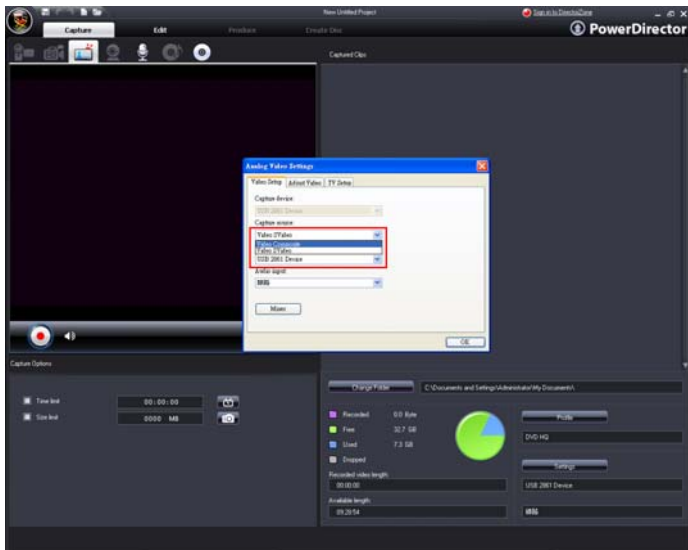

Fig.2
